CUSTOM CALLING SERVICE

A. GENERAL

1. Custom Calling Service features are offered from only the selected offices where the Telephone Company has arranged the facilities for that service, and is furnished subject to the availability of facilities.
2. Custom Calling Service includes one or more of the following service features.

a. Call Forwarding Variable Feature

Call forwarding variable permits the customer to activate and deactivate a transfer of his incoming calls to another telephone line. Because of transmission limitations, it is recommended that the calls be transferred within such customer's local service area.

The Call Forwarding Variable customer is responsible for any applicable customer-dialed station-to-station toll charge.

b. Three-way Calling Feature

Three-way calling permits the customer to add a third party to an existing connection, thereby establishing a three-way conference call. Because of transmission limitations, it is recommended that not more than one of the parties included in such three-way conference call be outside the local service area of the customer establishing such call.

Customers may utilize Three-way Calling on a subscription basis or on a pay-per-use basis. Customers obtaining the service on a subscription basis order the service in advance and the feature is always activated for their use. These customers incur a monthly charge and receive unlimited use of the Three-way Calling feature. Customers who obtain the service on a pay-per-use basis order Three-way Calling in advance and then activate the Three-way Calling feature by dialing an activation code each time they want to utilize Three-way Calling. These customers incur a specific charge for each activation (usage) of the Three-way Calling feature but no monthly charge. The pay-per-use option is only available where facilities permit and at the option of the Telephone Company.

c. Speed Calling Feature

Speed calling permits the customer to place local and message toll calls to a pre-selected group of telephone numbers by dialing abbreviated codes. Speed calling is provided in capacities of eight or thirty telephone numbers.

CUSTOM CALLING SERVICE

A. GENERAL (Cont'd)

2. (Cont'd)

d. Call Waiting Feature (including Cancel Call Waiting Feature)

- (1) Call waiting permits the customer, upon receipt of a tone signal indicating that a call is waiting, to place an existing call on hold by depressing the switchhook, and answer such second waiting call.
- (2) Cancel call waiting permits the customer to deactivate the Call Waiting feature on an individual call by dialing a code before making an outgoing call.
- (3) Long Distance Alert (LD Alert) is a feature on the Call Waiting Service which indicates to Call Waiting subscribers - while on a call in progress through a special signal - that an incoming call is long distance. This feature overrides the Multiple Directory Number (Distinctive Ring) feature for long distance calls. (See Note.) (N)

e. Call Forwarding Busy Line Feature

Call forwarding busy line allows for forwarding of an incoming call when the activated line is busy. The Call Forwarding Busy Line customer is responsible for any applicable customer-dialed station-to-station toll charge.

f. Call Forwarding Don't Answer Feature

Call forwarding don't answer allows for forwarding an incoming call when the call remains unanswered after a pre-determined number of rings (approximate number, 1 to 7, selected by the customer). The Call Forwarding Don't Answer customer is responsible for any applicable customer-dialed station-to-station toll charge.

Note: Due to interaction issues between Long Distance Alert and the Multiple Directory Number (Distinctive Ring) feature, the Long Distance Alert service will be available to customers on April 15, 2001. (N)

Issued: April 4, 2001

Effective: April 1, 2001

CUSTOM CALLING SERVICE

A. GENERAL (Cont'd)

2. (Cont'd)

g. Multiple Directory Numbers Per Line With Distinctive Ringing Feature (N)

- (1) The Multiple Directory Numbers Per Line with Distinctive Ringing feature (MDNL) will provide customers the benefit of up to three Directory Numbers (DNs) on a single access line, each with a unique distinctive ringing pattern, without an additional line termination, and without additional station equipment. The access line will be designated as the "Master" DN and will receive a standard ring. Any additional DNs associated with the same access line number will be called a "Dependent" DN and will receive distinctive ringing. Each Dependent DN will have a non-standard distinctive ringing pattern.
- (2) If a customer subscribes to Call Waiting, distinctive call waiting tones that correspond in cadence to the distinctive ringing patterns will also be provided for each of the additional DNs.
- (3) Customers with MDNL who subscribe to Call Forwarding must designate whether calls to only the "Master" DN or to all DNs are to be call forwarded.
- (4) Customers subscribing to the MDNL feature can subscribe to all other Custom Calling Service features available to them. However, regardless of the number of DNs a line has, it can only have one set of custom calling features applicable to all the DNs.
- (5) A call directed to an off-hook MDNL line will receive busy treatment; regardless of which DN (Master or any of the related dependents) was dialed.
- (6) Residence rates for MDNL service will be charged to customers qualifying for residence rates as defined in Section 2 of this Tariff. Nonresidence rates for MDNL service will be charged to customers qualifying for nonresidence rates as defined in Section 2 of this Tariff. A change in "Class of Service" (Residence to Nonresidence) will be required in connection with a residence customer requesting and receiving nonresidence MDNL service.

CUSTOM CALLING SERVICE

A. GENERAL (Cont'd)

2. Custom Calling Service includes one or more of the following service features: (Cont'd)

h. Call Waiting Deluxe

Call Waiting Deluxe is a feature that allows a customer to control the treatment applied to incoming calls while the customer is off-hook on an existing call. While on an existing call, Call Waiting Deluxe notifies the customer of an incoming call with the call waiting feature and provides several additional call disposition options. Call Waiting Deluxe incorporates the functionality of the Call Waiting (T) feature, including Long Distance Alert, in addition to call disposition options. (C) The Long Distance Alert feature overrides the Multiple Directory Number (N) (Distinctive Ring) feature for long distance calls. (N)

A user's perception of Call Waiting Deluxe will be affected by 1) whether they receive Calling Identity Delivery (CID) data for a waited party (Caller ID type services), and 2) the type of Customer Premises Equipment (CPE) used. The application of CID while a call is waited, allows the Call Waiting Deluxe customer to select a disposition option based on information about the waited party. The CPE will determine how Call Waiting Deluxe options are displayed, selected and in some cases, how they behave.

The Call Waiting Deluxe customer must also subscribe to Call Forwarding Don't Answer Service in order to forward a waiting call to another location.

Call disposition options provided with Call Waiting Deluxe include:

- Answer the call and put the existing call on hold,
- Answer the call and disconnect the existing call,
- Forward the call,
- Connect the call to an announcement,
- Put the call on hold,
- Conference the call with the existing call.

Utilization of the full capabilities of Call Waiting Deluxe requires the use of compatible CPE at the customers' premises. The installation and maintenance of the compatible CPE and the technical capability of that CPE to function in conjunction with features of Call Waiting Deluxe is the responsibility of the customer. The

CUSTOM CALLING SERVICE

A. General (Continued)

2. Custom Calling Service includes one or more of the following service features (Continued)

h. Call Waiting Deluxe (Continued)

The Telephone Company assumes no liability, and will be held harmless, for any incompatibility between this equipment and the Call Waiting Deluxe features.

The service will only be provided in central offices that are equipped to provide the Call Waiting Deluxe features.

Call Waiting Deluxe will be furnished only in connection with individual line service. The service is not available in connection with Centrex Type Services, Private Branch Exchange Trunk Type Services, or Payphone (Coin) Type Telephone Service.

i. Message Waiting Indicator

The Message Waiting Indicator provides either a stutter dial tone for the end user on the associated access line(s), or a signal to activate/deactivate a message waiting light on the end user's telephone set.

j. Call Transfer Service

Call Transfer Service (Call Transfer) is a feature that allows a customer (POTS customer) to transfer an established call terminating on their telephone line to any other telephone line. Call Transfer allows the customer to (1) transfer the call and then hang-up leaving the other two-parties on a two-way call, or (2) to bridge the call and establish a three-way call. If the call transfer subscriber hangs up once a three-way call has been established the call will be considered transferred and the other two parties will be able to continue on a two-way call. The Call Transfer customer is free to originate and terminate additional calls after the call has been transferred. Any charges applicable to the call will be billed to the Call Transfer Subscriber. The Call Transfer customer is responsible for the second leg of the call. Any toll usage charges associated with the second leg of the call will appear on the Call Transfer Service customer's bill.

Certain material appearing on this page formerly appeared in Section 14 on pages 169 and 208.

CUSTOM CALLING SERVICE

A. GENERAL (Cont'd)

2. Custom Calling Service includes one or more of the following service features (Cont'd)

k. TALKING CALL WAITING

Talking Call Waiting Service is a feature that allows a subscriber on a call in progress, upon receiving a tone signal indicating that another call is waiting, to hear the name of the second calling party. The name is spoken to the subscriber directly after the call waiting tone is sent. The Talking Call Waiting subscriber does not need to hit the flash button in order to hear the spoken name of the incoming caller.

The subscriber has the option to accept the incoming call by placing the existing call on hold (depressing the switch hook) and answering the waiting call or to ignore it.

1. ANYWHERE CALL FORWARDING

Anywhere Call Forwarding allows subscribers the capability to remotely change the termination of their incoming calls to another telephone line using any tone signaling telephone. The customer can activate, deactivate, or change the destination number using a personal identification number (PIN). (N)

4. Normal quality of transmission may not be maintained on all calls.
5. When the call forwarding features busy line and don't answer are provided on the same line, the forwarded-to number must be the same. When either call forwarding busy line or call forwarding don't answer are provided, it may be necessary for the forwarded-to number to be in the same central office, as determined by the facilities available in the customer's serving central office.
6. Customers subscribing to Custom Calling services are provided with a thirty (30)-day Customer Satisfaction Guarantee. The 30-day Customer Satisfaction Guarantee will provide the customer up to a 30-day credit for the monthly charge associated with the service, if they are not satisfied with the service. The credit will be provided only for the time the customer has the service, up to a maximum of 30 days. To receive the credit the customer must notify the Telephone Company of their dissatisfaction with the service and place an order to discontinue the service within 30 days of the time that the service was installed. The customer will also be credited for the nonrecurring charge associated with the service if one was charged. (N)
